Can you build your own? important to consider when building a/the temple? What does God ask is included in the temple? What parts do you feel are important to include?

Take some time to discuss how to build up a temple such as Solomon s. Using **any** available resources.

Which of the activities would you describe as worship, which would you describe as social action (supporting people in need), and which would you describe as purely social activities? I wonder what part social activities play in a church? What about groups that just hire the church rooms but are not part of any other aspect of the church? Would you describe these as part of the church?

Think about who the activities might appeal to. Is there anything you can think of that your group that they maybe could do, or that you think you could do? Think about whether any of the activities appeal to you and what, if anything, the church might offer to people of your age. Think about which of the activities the church engages in might also be places where God is found too.

Does your group feel part of the church? If not, what would help you feel more
